Figure 23: Penetration Rate¹ Ratios (PRR) by Ethnicity Among Estimated Population Living At or Below 200% Federal Poverty Level with SED and SMI in SA 6 Compared with Countywide
FY 2010 - 2011

¹ Penetration Rate (PR) is the number receiving mental health services (MHS) based on estimated need. Penetration Rate is calculated as the number of LACDMH consumers served divided by the number of persons estimated with SED and SMI. Penetration Rate Ratio (PRR) by Service Area (SA) is calculated as: PR for a group within a SA divided by Total PR for the SA. Countywide (CW) Penetration Rate Ratio is calculated as: PR for a group within SA divided by Total CW PR for that group. PRRs reflect the likelihood of group with MHS needs being served as compared with other groups being served within SA or Countywide.

For example a PRR of 2.2 ($152.6/70.7=2.2$, see Table 1) for African Americans in SA 6 indicates that African Americans are 2.2 times as likely to receive MHS in SA 6 as compared with all other ethnic group consumers in SA 6. A PRR of 0.66 ($152.6/232.0=0.66$) for African Americans –Countywide indicates that African Americans are 0.66 times as likely to receive MHS in SA 6 as compared with all other African American consumers in the County of Los Angeles. Please note that PRR only takes into account two factors and are not multivariate analysis.

Notes:¹ Numbers Served represent consumers served by LAC-DMH in Short Doyle/Medi-Cal Facilities. The count does not include consumers served in Fee-For-Service Outpatient facilities, institutional facilities such as jails and probation camps as well as Inpatient facilities including Fee-For-Service Inpatient Hospitals. ² Penetration Rate = Number of Consumers Served / Numbers of People Estimated with SMI & SED. ³ When an ethnic group is a smaller proportion of the overall population in that Service Area, penetration rates exceed 100% because of the disproportionate geographic distribution of that particular ethnic group in that Service Area.
