## Prevalence of Serious Emotional Disturbance (SED) & Serious Mental Illness (SMI) (2007)

California State Department of Mental Health calculates prevalence of Serious Emotional Disturbance (for children) and Serious Mental Illness (for Adults) for all the Counties in the State. These estimates are calculated by applying prediction weights and developed from nationally prominent survey studies and applied to California counties' population demographics. The State recommends that prevalence rates should be understood as reasonable estimates rather than counts of actual individuals.

Prevalence Rate by Ethnicity: Whites = 6.32%, African American = 7.17%, Latino = 7.65%, Native American = 6.58%, Asian/Pacific Islander = 7.0%.  
Prevalence Rate by Gender: Males = 6.37%, Females = 7.76%.

Prevalence rates are available at [http://dmh.ca.gov/Statistics and Data](http://dmh.ca.gov/Statistics_and_Data)

## Poverty – SA 2 2007

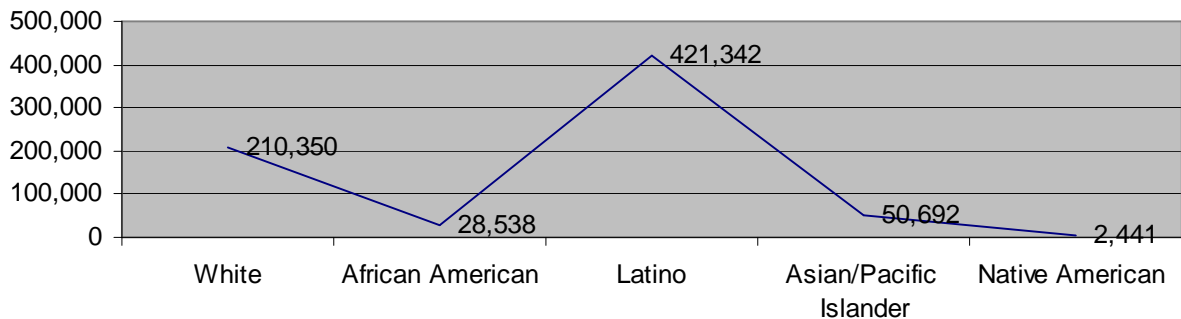

Poverty levels are established by the United States Census Bureau. The US Census Bureau uses a set of money income thresholds that vary by family size and composition to calculate the poverty levels. The official poverty levels do not vary geographically and are updated for inflation using Consumer Price Index (CPI-U).

The official poverty definition uses money income before taxes and does not include capital gains or non-cash benefits (such as public housing, Medicaid, and food stamps). Money from income includes earnings, unemployment compensation, social security payment, and public assistance payments.

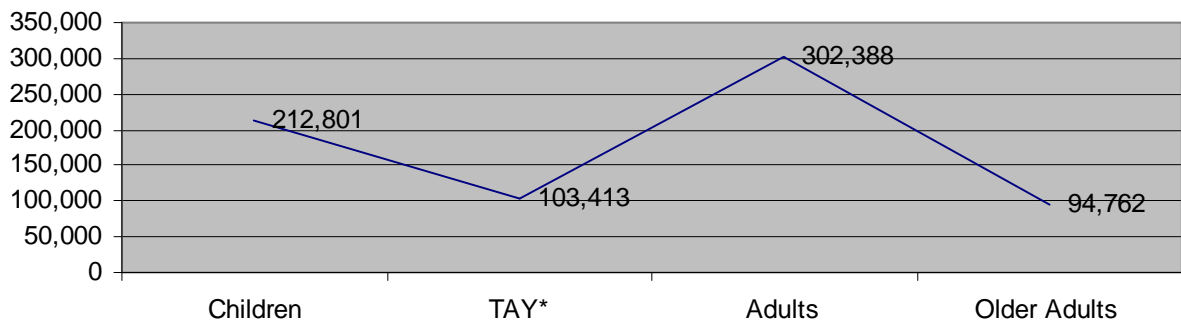

In 2007 the average 100% poverty level for a family composed of only two adults was \$13,540, for a family of two adults and two children it was \$21,027. 200% poverty levels are estimated as twice the amount of 100% poverty threshold. For example, for a family of four with two children and two adults the income level for 200% poverty is  $\$21,027 \times 2 = \$42,054$ .

In SA 2, in 2007, nearly 713,364 individuals were estimated to be living at or below 200% poverty level.

### Population Living Below 200% Poverty by Ethnicity

### Population Living Below 200% Poverty by Age Group

\*Transition Age Youth

Charts prepared by Data-GIS Unit – QI and Training Divisions 2010.

**Prevalence of Serious Emotional Disturbance (SED) and Serious Mental Illness (SMI) among Population Living at or Below 200% Poverty Level – SA 2 - 2007**

Estimated prevalence of SED and SMI among poverty population is applied to population estimates of people living below 200% poverty. The State Department of Mental Health calculates the prevalence of mental illness among population living at or below 200% poverty at 8.8%.

Prevalence Rate by ethnicity for population living at or below 200% poverty is Whites – 8.70%, African Americans – 8.50%, Latinos – 8.90%, Native American – 7.10%, and Asian/Pacific Islanders – 8.90% (see Table 10).

\*TAY = Transition Age Youth

Charts prepared by the Data-GIS Unit: QI and Training Divisions – 2010.
